Software Requirements Specification (SRS) for CTU-Buddy

1. Introduction

Purpose of CTU-Buddy Website

The CTU-Buddy website aims to enhance the learning experience for students at City Technical University (CTU) by providing a comprehensive and interactive platform. The website will feature various functionalities that cater to the educational needs of students including a timetable, discussion forum, resource sharing, and more.

Project Scope

The scope of the project for this phase includes the design and development of a static website for CTU-Buddy with the following pages:

- Home
- Timetable
- Discussion
- Share Resources
- About Us
- Contact Us

The website is intended to be a user-friendly platform for students to manage their schedules, engage in collaborative learning, and access educational resources.

Team Members with Roles and Responsibilities

The following are the team members and their roles (Also allocated in another document included within the zip folder):

Member	Role
Amy Lee Baker	• Front-End Developer • Code Debugger • Project Supervisor
Casper Hendriks	• UI/UX Designer • Back-End Developer • Code Tester
Janco Van Heerden	• UI/UX Designer • Back-End Developer • Systems Architect
Casper Andries Willemse	• Front-End Developer • Project Manager

2. Project Description

User Needs

CTU-Buddy will cater to the needs of students by providing an organized and accessible platform for managing their academic activities. Students need a reliable system to check their timetables, engage in discussions, share resources, and connect with peers.

- Timetable Page displaying according to their program that the student is enrolled in.
- Resource Page allowing the student to download assignments, upload assignments and download any additional documents.
- Contact Us Page, allowing the student to contact CTU regarding anything they need.
- Log In Page for the users to log in to their student accounts
- Discussion Page for students to talk with each other as well as with lecturers.

Project Goals

The goals of the project are:

- To create a visually appealing and easy-to-navigate website.
- To ensure that the website meets the functional requirements specified by the project scope.
- To complete the project within the given timeline and with the available resources.
- To be able to work in a team effectively and efficiently.

Project Purpose

The purpose of the CTU-Buddy project is to provide an enhanced educational experience at City Technical University by offering a platform that supports student engagement, resource sharing, and academic management. It is also to us as the creator's experience and time to do research on web development.

3. System Features and Requirements

Functional Requirements

- **Home Page:** Central hub with relevant information, including features, images, videos, and animations.
- **Timetable Page:** Displays student schedules with date, time, modules, and days of the week.
- **Discussion Page:** Platform for collaborative learning with threaded discussions and user profiles.
- **Share Resources Page:** Allows students to upload, categorize, and download educational resources in PDF format.
- **About Us Page:** Provides information about CTU-Buddy, its purpose, vision, and the team behind it.
- **Contact Us Page:** Includes a contact form and a map showing the CTU campus location.

System Features/Non-functional Requirements

The non-functional requirements include:

- **Responsiveness:** The website should be accessible and functional across various devices, including desktops, tablets, and mobile phones.
- **User Interface:** A consistent and aesthetically pleasing interface with a focus on usability and navigation.
- **Security:** Basic security measures should be implemented to protect uploaded resources and user data.

Project Planning

The project planning involves the following:

- **Timeline:** The project is to be completed within the specified timeline (from 09-08-2024 to 26-08-2024).
- **Testing and Debugging:** Thorough testing will be conducted to ensure that all features work as intended before final submission.
